

MediaPOINTE DMR210e

Digital Media Recorder

The MediaPOINTE Digital Media Recorder DMR210e streams and records videoconferences, meetings, and presentations in high resolution. This powerful MPEG-4 solution is capable of simultaneous recording and streaming (unicast or multicast) at up to 30fps, it also boasts MediaPOINTE's *CopyMe!* technology allowing for immediate distribution of content via DVD-ROM, USB flash drive, or FTP off-load for added portability of content. Besides the web interface the DMR210e also has a set of front panel controls, on-screen menus, and a remote control which make this system a snap to use, both in content creation and distribution.
