

Raxxess custom mounting kits offer an easy and attractive solution for rack mounting non-rackmount components. Perfect for custom home installations, office suites or any other location where aesthetics are as important as sound, these kits will give your installation the "custom" look that your clients will love. Our library of component dimensions grows daily, making it easy for you to have a perfectly finished look with any installation. Each kit includes the aluminum faceplate with brushed, black anodized finish, cold-rolled steel rack shelf, and rear braces that prevent shifting. Optional clamping bars are available when maximum stability is required.

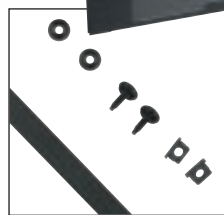

## CUSTOM MOUNTING KITS

- 16-gauge cold rolled steel shelf, black finish.
- .060" flanged aluminum faceplate, black or clear brushed anodized finish.
- One piece shelf easily assembled, just bend tabs over sides of shelf and install in rack.
- Available in 2-10 rack spaces.
- Typical delivery time is 4-7 days.
- Adjustable brackets to secure component.
- Optional clamping bars add additional security for mobile installations.
- Slotted shelf for ventilation-assists convection cooling
- Large and continually expanding database of most popular components.
- CMF (custom mounting faceplate) & CMS (custom mounting shelf) can be ordered separately.

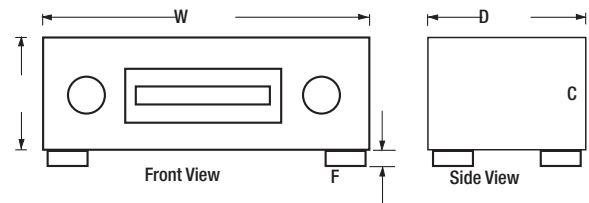

## FSK finishing kit

To achieve ideal aesthetics in residential installations, our new finishing kit is available in both black anodized (FSK-B) or in clear anodized finish (FSK-CL) a complete compliment of washers (16), screws (16) and end caps (8) are included with the individually sold strip (45 spaces). Can be easily cut to fit either by installer or at factory (at no additional charge.)
