

CONVERTA RACKS

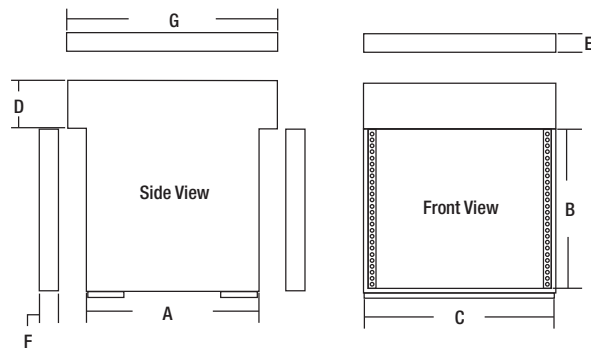

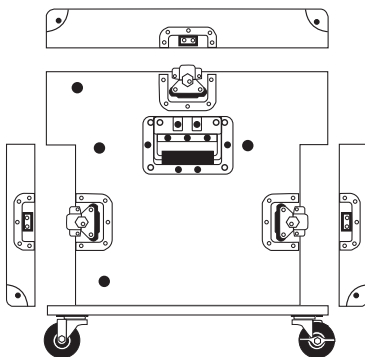

CR converta rack recessed

A great design to maximize rack storage in a minimum of vertical space. Ideal for the dj or musician who wants to get on and off the job in as short a time as possible. After removing the top of the rack, 10 or 12 spaces of gear can be moved to any of 8 different stops from zero to 45°. Removing the front panel allows the use of 6 or 10 spaces of equipment. Remove the rear cover and there is easy access for patching and connecting cables. The Converta rack is constructed with 1/2" plywood with black carpet covering, recessed spring loaded handles and latches. Casters are standard with CR-10/10 and CR-12/10. Optional caster base available for CR-10/6

CR-SM surface mount

Same features as recessed rack (see above). The Converta rack is constructed with 1/2" plywood with grey carpet covering, surface mounted handles and latches. Casters are optional.

features

- Available in 3 standard sizes (CR-10/6, CR-10/10, CR-12/10)
- Portable and easy to use
- Quick and easy set-up
- Internally braced
