

ERT-ST steel elite roll top

The ERT-ST Elite Roll-Top is a secure, semi-portable audio/video control center. Constructed of steel powder coat, rack ships assembled via common carrier. The ERT-ST features a curved facade with ultra strong tracking system and ball bearing action.

ERT-ST

ECR-ST steel elite converta rack

Talk about heavy duty! Raxxess has incorporated all of the features of our very popular ECR series of racks into an all steel version. Extremely rugged and secure, the ECR-ST has greater capacity than its counterparts. Below the key lockable and retractable steel top is a 12 rack unit mixer section that can be moved to any of 8 different positions, from 0-45 degrees. Below it, and behind another key locked, steel door, is a 16 rack unit section for mounting electronic components. Like the front door, the locking steel rear door also features abundant slotting for passive ventilation when the unit is closed. Extra heavy duty casters are standard fare. The ECR-ST is finished in durable silver and black powder coat. Adjustable rear rack rail optional.

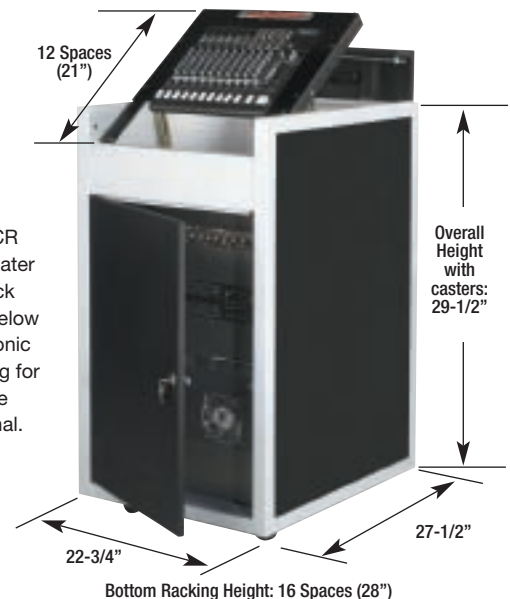

ECR-ST-SL optional steel shelf

Steel shelf folds out from either side of the ECR-ST and locks in place. A perfect surface to support a laptop, a projector or your lunch. The steel, powder coated surface measures a generous 19" x 21-1/2" and easily folds out of the way when not being used.

ECR-ST-PS optional podium shelf

The easy to install podium shelf turns your ECR into the perfect presentation piece. A lip is on the bottom edge to support reading materials, eyeglasses or pens and pencils. The podium shelf can be adjusted to eight different reading positions and folds down and out of the way when not in use. KO's for XLR and BNC connectors.
