

Q-Raxx isolation rack

Raxxess offers Q-RAXX, the answer to excess noise created by amplifiers, receivers, computers and hard drives. The Q-RAXX are outfitted with acoustical foam inserts, gasketed, plexi glass front door and a solid gasketed rear door that houses a QFPL-2 quiet fan assembly. A perforated and filtered vent opening, is located in the bottom with grommets in the rear for cable passage. The Q-RAXX are available in a variety of sizes to fit any application including the Q-13-25 that fits seamlessly with our Config-U-Raxx systems.

The Q-RAXX is available in 14 or 20 rack spaces. Both sizes are available in 30" depths, while the 14-space version is also available in 24" depth. Constructed of 3/4" thermally fused melamine, and available in our ebony fleck or maple finishes. Casters are included. Ships assembled via common carrier.
